## OVER 200 ACRES DEVOTED TO GROWING HARDY TREES, PLANTS, SHRUBS, EVERGREENS AND ROSES

### Where We Are

We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-three miles, almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers, Arkansas.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

### We Sell Direct, No Salesmen

Save from 75 to 100% in buying direct from the growers. Salesmen are compelled to try to make you believe they have better stock because they have to charge you more for their commission. Buy at our low prices where no salesman's commission is added in the cost of the stock.

### We Grow Our Own Stock

Over 200 acres devoted to growing hardy Ozark Mountain Grown Nursery Stock. It is grown on the tip top of the Ozark Mountains where the soil and climate conditions are ideal for producing the most vigorous, hardiest, and best rooted trees and plants that can be grown.

### Our Stock is Adapted to All Climates

We ship to every state in the Union and many foreign countries. We have cool summer nights and short growing season making our stock well adapted to the extreme Northern, Eastern and Western states as well as being the best for Southern states.

### Money Back Guarantee

We guarantee you to be satisfied with our stock. Upon receipt of your order, inspect our plants and if you are not satisfied, return them to us and we will refund the amount paid, plus the transportation charges paid by you.

### Low Prices

Why can we sell such high quality stock at such amazing low prices? Because we use extra economy in growing, selling, and shipping nursery stock. We have no salesmen to pay commissions. All this savings is passed on to you in these amazing low prices.

### State Inspected

Our trees and plants are inspected by the Arkansas State Plant Board and again by experienced nurserymen before shipping. We guarantee you receive no diseased stock from us. Every plant inspected to protect you from any inferior stock.

### Experienced Packing

We use the best material available for packing our orders thereby insuring you that all stock arrives in first class condition and will grow. We've had years of experience in shipping nursery stock.

## THIS FALL IS THE BEST TIME TO PLANT THAT ORCHARD

—WHY DO EXPERIMENT STATIONS, AGRICULTURAL COLLEGES AND FRUIT GROWERS RECOMMEND FALL BUYING? Because you can buy this Fall and have the stock shipped to you and "heel it in" so that you may plant at the most favorable time during Fall, Winter, or next Spring.

Fall Planting is becoming more popular each season as experience shows its advantage. As soon as a tree or shrub becomes dormant it can be removed and change of location will affect it but little. When set out in the Fall the bruised roots begin at once to heal and callus is formed; recover quickly from moving;

soon become firmly established and with the first touch of Spring are ready to go into business for themselves in a vigorous way.

Again, the ground is usually in better condition for planting in the Fall than in Spring, for much Spring planting is done when the ground is too wet for best results. Perhaps your Spring will be two or three weeks earlier. In this case your trees should be planted earlier than the dates you have ordered them shipped. If they have been planted in the Fall, these Spring delays are done away with.

### ORIENTAL ORCHIDS OF THE GARDEN (IRIS KAEMPFERI)

Your garden is not complete until you have this beautiful flower growing in your perennial collection. Now you can grow your own Orchids by planting Iris Kaempferi, which is entirely different from all other Iris and comes into bloom as the early summer fades, continuing to bloom until mid-July. The huge blooms of velvety texture measure 6 to 8 inches across. The leaves are long, narrow and gracefully formed, and the plants remain decorative even after the blooming period is over. It is no wonder that the Kaempferi is called the "Orchid of the Garden." Excellent for cutting it will grow 3 to 4 feet high. Plants thrive in well drained fertile soil (it is fatal to select a location where water stands during winter).

Mixture of Colors: Rose, White, French Blue, Purple-Violet, Lavender, Variegated.

# HARDY OZARK MOUNTAIN GROWN STOCK NOVELTIES FROM THE OZARKS

**Important Notice!!** A new disease of strawberry plants (Red Stele Root Rot) is very destructive and reports of damage vary from 40 to 92 per cent reduction in fruit crop. No treatment of the disease is known and the fungus will live in the soil for several years making it unprofitable to produce strawberries on the same land where the fungus has been in the soil. This disease is spreading rapidly. DON'T TAKE ANY CHANCE OF GETTING INFESTED PLANTS. ORDER FROM US. Our plants are twice inspected, once in the Spring for Red Stele disease and once in the Fall for all kinds of insects and diseases that attack strawberry plants. Our plants are found to be apparently free of all diseases. ORDER OUR PLANTS FOR HEALTHY STURDY PLANTS. DON'T GAMBLE ON CHEAP PLANTS AND LOSE YOUR FRUIT CROP.

**JUJUBE**  
(Hardy Chinese Date)  
The Chinese Date (Jujube or Zizyphus) is a fruit from the high interior of China. The tree is a heavy and constant bearer and commences to bear at an early age, four-year-old trees having produced 150 pounds of fruit. It blooms very late in the spring, avoiding all danger from spring frosts. The fruit is one to two inches long, and chocolate colored. It is delicious when eaten fresh or cured like dates, and is excellent for preserves and jam. Cooked in a sugar syrup and allowed to dry, it becomes a most tasty and palatable confection which we believe will eventually rival the date as a commercial product. Every home should have one or more trees. It likes a clean back yard where it is not cultivated but will grow anywhere.

## BLUE BERRIES

GROW YOUR OWN BLUEBERRIES—  
PICK THEM FRESH OFF THE BUSH

Cultivated Blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fruitful and ornamental all year.  
Every home garden, no matter how small, has room for at least a few of these Blueberry plants. It takes only a few to produce all the berries an ordinary family will need. As a commercial proposition it is one of the most profitable fruits to grow. There is a big market for these delicious Blueberries. They make good money in a very short time, for you can begin picking the second or third season after planting.

Blueberries are also ornamental shrubs of rare beauty. They may well be used in association with their close relatives, Laurel and Rhododendron. In pleasant contrast to the light evergreen masses of the latter, Blueberries give lightness, grace, and color. Plant them in rows, in clumps on the lawn, or in the shrubbery border. A hedge of Blueberries is both profitable and ornamental.

Choose a piece of ground easily supplied with moisture during dry summer months; it should not, however, at any time become water-logged. Plant in full sun if possible; they will also do well in partial shade. Be sure the soil is acid. Give only shallow cultivation, not over 2 to 3 inches deep, so as to leave the roots undisturbed.

### NEW BLUEBERRIES

Concord. Bush of upright habit, at maturity exceeding 6 feet in height. The berries are large, Jersey. Very large and vigorous in habit. The light blue berries are very large.

2-yr., 12 to 18 in. \$1.25 \$3.00 \$5.50 \$9.00  
We recommend ordering both varieties so they will cross-pollinate and fruit freely.

## OUTSTANDING VALUES IN QUALITY FIELD SEED FOR HAY, PASTURES AND SOIL BUILDERS

We recommend the fall seeding of grasses. They like cool growing weather to get started. They are less sensitive to cold than they are to heat and have a better assurance of getting a satisfactory stand. Can be sown as late as wheat in the fall but better to sow earlier.

### ORCHARD GRASS

A wonderful grass that starts growing early in the spring and grows very late. A perennial grass that is grown in most states. Is a bunch and more heat than Timothy. Grows well in shady places. Makes a splendid permanent pasture. Harvest when reaches full bloom as the stems tend to become woody. A second rapid growth is produced, making a second crop of hay. Yields 1 to 2 tons per acre. Plant 20 lbs. to acre.
